Antek Dynaco ST-35-Compatible Tube Amp Chassis

This upgraded ST-35-compatible tube amplifier chassis is constructed from **heavy-duty 0.08-inch-thick aluminum** with a durable anodized finish, offering excellent structural rigidity, long-lasting durability, and a premium appearance. Its solid aluminum construction provides a sturdy foundation for a reliable and professional-looking tube amplifier.

The chassis is manufactured to **match the original Dynaco ST-35 chassis dimensions and layout**, with precision-punched openings for mounting the original tube sockets and transformers. It is designed to accommodate the original ST-35 power transformer and output transformers, allowing builders to reuse original components or install compatible replacements.

For added convenience, the chassis includes modernized connectivity, with speaker terminals, RCA input jacks, and an IEC AC power inlet to support contemporary audio connections and power requirements.

Designed for maximum compatibility, the chassis accommodates the **original Dynaco ST-35 amplifier PCB** as well as compatible third-party replacement PCBs that follow the original ST-35 mounting layout. This allows installation without requiring chassis modifications.

Ideal for ST-35 restoration projects, DIY amplifier builds, and custom tube audio applications, this upgraded chassis combines the original ST-35 dimensions and component layout with durable aluminum construction and modern manufacturing. It provides an excellent solution for enthusiasts who want to preserve the classic ST-35 design while giving their amplifier a fresh, updated appearance.

Compatible Components

- Output Transformer: Z-565 x2
- Power Transformer: P-774
- IEC Power Inlet: CW2B-10A-T
- Main PCB: Original or third party PCB
- Power supply PCB: STA-70PS
- RCA Connectors: Panel-mount X2
- Speaker Connectors**:** Panel-mount ×6
- Tubes: EL84 or 6BQ5

Package Includes

- Main chassis, Bottom plate, & 2 side panels
- IEC power inlet with fuse
- Power Switch
- Screws and feet
